

Flexible funding for agencies that want to fund their invoices **on their own terms.**

“

RFS are true recruitment specialists with an in-depth understanding of our specific needs.

”

We're recruitment specialists

Unlike many other funders on the market, we're 100% focused in the recruitment sector. We've worked with and funded hundreds, if not thousands of recruitment companies over the years and that's helped us develop some finely honed systems and processes, and foster an in-depth knowledge of how recruitment works.

Take control with:

✓ Turnover in your agency's name

It's your turnover, on your terms. Through RFS Evolve you have increased flexibility to trade how you want and retain the turnover within your business, in your agency's name.

✓ Bad debt protection

Fully inclusive protection against all bad debt incurred within agreed credit terms, saving you the cost and stress associated with holding your own expensive policy.

✓ Up front fees

RFS Evolve uses a 'bundled' fee meaning the charges are applied as a single service fee and therefore easier for the agency to understand. This mechanism is another example of the 'recruitment friendly' way in which RFS operate.

✓ Technology-led solutions

We combine our bespoke funding platform with established finance technology to provide our agencies with the tools they need to run and build their recruitment businesses. Understanding the recruitment sector as we do has allowed us to create a simple, yet effective online portal system that delivers meaningful management information and resources in an easy-to-use platform.

✓ No disapproved invoices

We do not disapprove invoices, therefore you will never have the horror of waking up and not having the available funds to pay your workers.

✓ Credit control

Our experienced credit control team offers an effective and friendly credit control service ensuring that we collect against your invoices without jeopardising your relationships.

Peace of mind for recruitment agencies with our **100% risk-free finance solution.**

“

I have found the RFS service to be first class offering flexibility and fantastic support whenever I need it.

”

Freedom to focus on what you do best

RFS Protect is our popular financing solution, which allows recruitment teams to focus on recruiting and billing, without worry about how debts or invoicing is managed, or cash collected. It's safe, predictable and 100% risk-free.

Stay protected with:

✓ Industry unique flat fee. No hidden add-ons

Unlike the majority of (perhaps all?) other funders, we offer a completely transparent, single pricing system. The fee you see is the fee you pay. We don't add on any extra hidden charges. It's an important distinction and one that many can overlook when just looking at headline rates.

✓ No set up fee or minimum monthly fees

As part of our single fee pricing structure, we've wrapped everything up in the rate we charge. It means you won't be surprised with additional fees for setting up your business with RFS, and in particular won't be affected by any minimum monthly fees during the early start-up days where you're building your business.

✓ No personal guarantees or debentures

We don't insist on personal guarantees or debentures (means a charge registered against the assets of a limited company, on behalf of any party owed money by the company). We provide a genuine plug 'n' play model offering recruiters the flexibility to focus on building their business, as we effectively run their back-office using our transparent and fair pricing model.

✓ Margin paid weekly

There's no need to wait until the end of the month, as we'll pay margins weekly. It helps provide a smooth cash flow, and certainty about the profitability of your business. This contrasts with other funders that may not pay out margin until one week after the workers have been paid, which means effectively waiting almost three weeks from workers starting work to being paid your margin.

✓ No bad debt excesses or disapproved invoices

Some funders charge over 10% or £1,000, whichever is higher, on bad debt claims. For example, facing a £50k debt from an unpaid client could result in a £5,000 excess payment. By choosing RFS you can avoid such charges, plus we never disapprove invoices, ensuring you always have funds to pay your workers.
